

VT-FBR-620

Fiber Optic (Diffuse Reflection)

Working principle	Fiber optic
Fiber head type	M6
Optical working principle	Diffuse reflection
Sensing distance	With PG1:200mm With PE1:250mm
Fiber length	2000mm
Fiber diameter	Ø 1 mm
Fiber arrangement	Standard

Technical Data

Core construction	Transmit: 1, receive: 1
-------------------	-------------------------

Integrated lens	No lens
-----------------	---------

Bend Radius	25mm
-------------	------

Material	Stainless steel + polyethylene
----------	--------------------------------

Accessories	Nut M6+ Washer x2
-------------	-------------------

Fiber can be cut short	Can be cut with fiber cutter
------------------------	------------------------------

Housing style	Short convex tube
---------------	-------------------

Core construction	Transmit: 1, receive: 1
-------------------	-------------------------
